Coverage includes extensive sections on lung cancer and other pulmonary tumors. All facets of thoracic disease are covered from anatomy and embryology to diagnostics, including extensive radiological sections. Multidisciplinary contributions on medical treatment, radiation oncology, and surgery and anesthesia are included.

Highlights include new material on minimally invasive procedures and thoroughly updated diagnostic and treatment information. Operative checklists are included in procedural chapters, and procedures are presented as bulleted to-do lists wherever possible. This edition also covers non-resection therapies for high-risk non-small cell lung cancer patients, including sublobar resection with adjuvant brachytherapy, radiotherapy ablation, and stereotactic body radiation therapy.
