Make the most of your next neurologic assessment!
- Complete coverage promotes a thorough, practical, and clinically revealing exam technique, with insightful material on mental status, the cranial nerve, motor, sensory, and cerebellar examinations, and assessment of reflexes and gait.
- Insight into the purpose of the different components of the examination, understanding when these examination elements should be performed, what you should look for, and what the findings mean.
- Clinical focus assists in the practical bedside evaluation of common neurologic symptoms to help practitioners learn the importance of tailoring the history and neurologic examination based on the clinical setting.
- Concise appendix of common neurologic tests provides brief summaries to help you choose the best approach for each patient.
