A wide range of often controversial questions are addressed by this volume, including issues raised by the treatment of detainees at Guantanamo Bay, the Reid model for interviewing and miscarriages of justice, the role of legislation in preventing bad practice, the effectiveness of ethical interviewing, investigative interviewing and human rights, responses to miscarriages of justice, and the likely future of investigative interviewing.

The book also makes comparisons between British and American approaches to detention without trial, and the role of confession evidence within adversarial legal systems. It also develops a set of proposals to minimize the risks of miscarriages of justice, irrespective of jurisdiction.
