Unlike other certification reviews, this book provides a special "question dissection" section of sample questions and test tips that help reduce test anxiety by preparing students for commonly seen questions and teach a critical thinking approach to answers.

Special features include:
* Overview of normal findings in physical assessment by organ systems in outline format
* Succinct review of diseases seen in primary care in outline format
* "Question dissection" chapter with specific test-taking tips for the exam

This new fast fact approach is the ultimate security blanket for RNs who have not started their study process or need a quick refresher right before the exam.
