Searching Skills Toolkit: Finding the Evidence

*A user-friendly, hands-on guide to literature searching, which is an essential skill for all involved in health care research and development, researchers, and students from all disciplines.*

Source: Wiley-Blackwell

Author(s): De Brun, Caroline; Pearce-Smith, Nicola; Heneghan, Carol; Perera, Rafael; Badenoch, Douglas

ISBN-10: 1405178884

The distinguishing feature of this pocket-sized searching skills book, like all the Toolkit series titles, is its user-friendliness. The guiding principle is that readers do not want to become librarians, but they are faced with practical difficulties when searching for evidence, such as lack of skills, lack of time and information overload. They need to learn simple search skills, and be directed towards the right resources to find the best evidence to support their decision-making.

- A unique book providing easy-to-comprehend search skill concepts using the following techniques:
  - Real life clinical scenarios
  - Utilising flow charts to highlight the sections that really matter.
  - Clear graphical layout, including screenshot images
  - Use of tables, figures and diagrams
  - Use of icons (e.g. to represent a learning point, or a task) and full colour.

Rating:

Doody's Star Rating® (68) (1st) ⭐⭐
