Coronary Artery Disease: A Research and Review Journal

Coronary Artery Disease spotlights the important developments, evaluates new literature and features unique regular in-depth reviews, edited by world authorities, highlighting the most significant advances in the field.

Source: Lippincott Williams & Wilkins (LWW)
Author(s): Sobel, Burton E.
ISSN: 09546928 EISSN: 14735830

Aimed at clinicians and cardiovascular scientists concerned with mechanisms, Coronary Artery Disease features reports of original research with a clinical emphasis, including observational studies, clinical trials, and advances in applied and basic laboratory research: the journal particularly welcomes important basic research that contributes to the understanding of coronary artery disease. Issues can contain an in-depth review on a major topic of current interest. These Reviews in Depth are prepared under the editorship of invited specialists, who commission a group of five to six leading workers in the field to contribute articles providing a concise yet in-depth overview of an aspect of the topic under review.
