OvidMD provides quick answers to clinical questions based on relevant, current full-text content from Ovid. Use OvidMD to uncover the latest treatment options, evidence-based guidelines, drug therapies and earn CME. OvidMD fills a clinical information gap between point-of-care tools and in-depth medical research, when a clinician has time to search for relevant answers in the literature.

Simply ask a clinical question. Type Ahead That Thinks Ahead technology suggests possible search terms as soon as you begin typing and makes exploring alternative, related topics quick and easy. OvidMD searches Ovid MEDLINE®, evidence-based guidelines, and your institution’s key clinical full-text journals, books and databases – all in a single search. Clinical Focus Navigators help narrow content by clinical need (Review Articles, Clinical Trials, Diagnosis, Treatment, Screening and Prevention, and Prognosis) as well as by type and date.

Quick, relevant answers to your clinical questions
Keep current with the latest research
Clinically-optimized search results every time
The only tool that allows you to see results from Ovid and UpToDate® in the same, easy-to-use interface
Thousands of downloadable patient handouts, an exportable image library, dozens of medical calculators and more
Physicians can earn CME through researching a clinical topic
Save searches and articles, email colleagues, set-up alerts and even export images for PowerPoint
Now optimized for iPad® and iPhone®
5 Reasons OvidMD helps you make the best evidence-based clinical decisions for every patient

Give physicians online access to the answers they need from clinically relevant sources you trust.

1. OvidMD was developed for and tested by physicians who see patients daily

2. The most clinically-relevant search results are always presented first

3. Evidence-Based Guidelines synthesize the best-available evidence on diagnosis, disease management, and drug therapy recommendations, written by physicians and updated quarterly

4. A to Z Drug Facts for dosages, side effects, indications, and information on drug therapies

5. Access UpToDate’s® synoptic, point-of-care content together with Ovid’s-full-text and bibliographic content in the same easy-to-use interface (requires subscriptions to both products)

Improved UpToDate® search!
Results from UpToDate that are displayed in OvidMD are updated in real time and displayed in the exact same order that UpToDate displays them.
