**Book News**

Please see below for descriptions of recent new titles and new editions: over 110 books!

**BEHAVIORAL & SOCIAL SCIENCES: SOCIAL WORK**  
In this update of a popular text, Leveton draws from the works of Moreno, Erickson, Satir, and Perls. She fashions a psychodramatic approach that will help therapists practice more effective group work. New to this edition is material on drama therapy and supervision in institutional settings.

**CLINICAL MEDICINE: CLINICAL LABORATORY SCIENCE & MEDICAL TECHNOLOGY**  
This book concentrates primarily on EUS with electronic scanning echo-endoscopes, presenting an introduction into the basic knowledge, the imaging diagnosis, and the EUS-guided interventions.

**CLINICAL MEDICINE: DERMATOLOGY**  
This comprehensive atlas deals with more than 80 different hereditary, autoimmune, and infective blistering diseases and blistering and pustular eruptions occasionally seen in other dermatoses.

**CLINICAL MEDICINE: INTERNAL MEDICINE-CARDIOLOGY**  
This book was developed with the objective of providing a relatively easy-to-read text that can serve as a handy reference on the principles and practice of cardiac pacing and defibrillation.

An innovative approach to the identification and management of heart failure - geared to specialists in cardiology and internal medicine, as well as general physicians and hospital pharmacists. It presents treatment options for specific patient groups; describes and evaluates alternative management strategies; and includes hypothetical scenarios with regards to best practice recommendations.

An innovative new approach to therapeutic decision-making, providing answers to a range of questions that the busy clinician faces on a daily basis. It addresses practical questions not covered in current guidelines; provides treatment recommendations based on hands-on clinical experience at major centers of excellence; and aids the physician in prescribing for the hypertensive patient presenting with challenging conditions.

Geared to general physicians, cardiologists, diabetologists, nephrologists, and doctors in training, this volume includes an overview of the latest developments in this complex field by reviewing the most significant papers published in the medical journals on lipid disorders over the last eighteen months.

**CLINICAL MEDICINE: INTERNAL MEDICINE-INFECTION DISEASES**  
This atlas is essential to improve diagnosis and therapeutic efficacy in AIDS and its related diseases and symptoms.

**CLINICAL MEDICINE: INTERNAL MEDICINE-ONCOLOGY**  
Now in its second edition, this newly updated text includes key information on cutting-edge treatments and medication, Hodgkin’s and Non-Hodgkin’s lymphoma, natural killer cells, T-cell lymphoma, autoimmune diseases, and much more. Comprehensive, insightful, and compact, it’s an essential guide for anyone coping with the disease’s physical and emotional turmoil.

**CLINICAL MEDICINE: NEUROLOGY**  
A new guide to vascular neurology offering a richly illustrated and practical guide to assist in the complex management and clinical decision-making involved in this fast-moving field.
In this atlas readers will find summaries of many years' experiences in pituitary operations.

These are the first pseudo-isochromatic plates in China.

The Random-dot Stereogram (RDS) is a state-of-arts method of the stereopsis tests.

This comprehensive atlas includes over 200 illustrations that demonstrate fine specimens, explicit structures and natural color of skin flaps based on surgical anatomy.

Ideal for students and clinicians, this book offers pathologists information on the pattern of differential diagnosis and pathological changes of the head and neck diseases.

Written by acknowledged experts in this field, this book provides state-of-the-art descriptions of the theoretical background and the practical aspects of the interventional neuroradiology.

This clinical reference book provides the knowledge and experience of oral and maxillofacial imaging diagnosis for dental students, postgraduates, young doctors, and also for clinicians in the fields of oral and maxillofacial radiology, oral and maxillofacial surgery, head and neck oncology, as well as ENT.

Ideal for Psychiatrists, Psychologists, Hospital pharmacists, and Trainees, this book updates the reader on the therapeutic options available for the management of schizophrenia.

This comprehensive atlas includes over 200 illustrations that demonstrate fine specimens, explicit structures and natural color of skin flaps based on surgical anatomy.

This atlas illustrates the clinical prosthetic procedures from the prospective of the microsurgical anatomy.

The second volume in an official and authoritative compendium of drugs contains monographs of chemical drugs, antibiotics, biochemical preparations, radiopharmaceuticals, and excipients for pharmaceutical use. The 3-volume series covers most traditional Chinese medicines, most western medicines and preparations, giving information on the standards of purity, description, test, dosage, precaution, storage, and the strength for each drug.

This comprehensive text discusses the major medications used to treat common mental health conditions and offers guidelines on how to best serve clients who are using them.

PUBLIC HEALTH: COMMUNITY HEALTH & DISEASE PREVENTION

The 2006 Year Book of Health in the People’s Republic of China is the 23th volume containing the latest information up to the end of 2005.

The 2007 yearbook (the 25th in the series) provides important information on Chinese health fields.

This volume contains the latest information on Chinese health fields.

These study cards are an essential clinical and academic guide to master various acupuncture points.
the art of acupuncture point location and functions.

Unlike the usual textbook, which contains a wealth of theory, but is short on real life clinical use, this book is a collection of experienced clinical practitioners who bring the practice of acupuncture to life!
