*“Use the OvidSP Webstats “Linking” report to track user’s document delivery and library holdings requested journals. We have noticed some customers request a lot of Doc Delivery from journals they already subscribe to, so it’s a great way to keep informed.”*

Elena Kostrikina, Tech Support Engineer, Sydney
Platform News

OvidMD was launched on Wednesday, May 18, 2011.

OvidMD, the first clinical tool from Ovid, provides quick answers to a physician’s questions based on relevant, current full-text content from Ovid.

OvidMD was designed from a clinical, evidence-based perspective to ensure results are meaningful to a practicing physician. Efficient and easy-to-use, OvidMD’s search is powered by sophisticated technology developed by the experts at Ovid.

Check out the list below for some of the content available on OvidMD!

- Ovid MEDLINE®
- Transplant Library
- UpToDate® Articles & Patient Handouts
- A to Z Drug Facts
- Evidenced-Based Guidelines
- Patient Handouts from RelayHealth, a division of McKesson®
- National Guidelines
- MedCalc
- LWW Current Opinion journals
- Journal and Book Subject Collections
- And many more

For more information on OvidMD, visit www.ovidmd.com.

Book News

Please see below for descriptions of 59 new premium eBooks.

BEHAVIORAL & SOCIAL SCIENCES: PSYCHOLOGY: CHILD DEVELOPMENT PSYCHOLOGY

With its comprehensive coverage of theoretical, historical, cross-cultural, and evolutionary perspectives, this book holds significant insights for parents, educators, and clinicians.

BEHAVIORAL & SOCIAL SCIENCES: PSYCHOLOGY-EDUCATION PSYCHOLOGY

This comprehensive book looks at the phenomenon of cheating from primary through graduate school. It presents the research on cheating in a clear and accessible way and provides practical advice and insights for educators, school administrators, and the average lay person.

BEHAVIORAL & SOCIAL SCIENCES: PSYCHOLOGY: CLINICAL PSYCHOLOGY

Building on the success of previous editions, Overcoming Depression and Low Mood presents a series of self-help workbooks for use in self-assessing and managing depression and periods of low mood, with support from a health care professional.

CLINICAL MEDICINE: GENERAL MEDICINE

Part of the 100 Cases series, designed for students, this volume covers a wide range of topics such as phobias, bereavement, and paranoia, across the following subject areas: Adult Psychiatry, Older People, Forensic Psychiatry, Child and Adolescent Psychiatry and Learning Disability Psychiatry.

The first 72 hours following assessment and admission to the emergency department are crucial to a patient’s care. Medical practitioners on duty need good diagnostic skills and the ability to formulate a quick, safe and appropriate management plan. Making Sense of Acute Medicine is here to help.

Provides invaluable ‘hands-on’ guidance for medical students and junior doctors when presented with a new patient.

CLINICAL MEDICINE: INTERNAL MEDICINE: CARDIOLOGY

Growing clinical experience and
additional clinical trials are resulting in changes in how patients are selected for CRT. This book—now in its second edition—provides basic knowledge as well as an up-to-date summary of new advances in CRT for heart failure.

With numerous illustrations of these devices, technologies, and strategies to improve the CTO success rate, this clinical guide is the ideal companion for interventional cardiologists and cardiac surgeons who are required to perform angioplasty and coronary stenting.

This brief guide to visual diagnosis helps the novice develop -- and the veteran refresh -- crucial skills that can spare the patient unnecessary testing and bring the physician one step closer to an accurate diagnosis.

This important revision presents the accumulated knowledge of its highly-regarded author, Dr. Abraham Rudolph, who is internationally recognized as one of the world’s leading pioneers in the field of Pediatric Cardiology.

Presents everything you need to assess your ability to interpret ECGs accurately; perform differential diagnosis; and decide upon the most appropriate clinical management in each situation.

The handbook’s ‘how to’ approach makes it the ideal reference text for the practicing sonographer.

CLINICAL MEDICINE: INTERNAL MEDICINE-ENDOCRINOLOGY & METABOLISM
Diabetes is a common and debilitating condition encountered by all doctors worldwide, regardless of specialist interest. This book aims to give the reader an understanding of the background, diagnosis, investigation and management of diabetes and endocrine disease.

CLINICAL MEDICINE: INTERNAL MEDICINE-GASTROENTEROLOGY & HEPATOLOGY
Aimed at the entire medical team caring for those with colorectal cancer, this book provides the most up-to-date information on the new and emerging treatments, looking at total patient management.

This practical up-to-date handbook provides answers to the questions and challenges that arise in day-to-day practice. It is suitable for all medical professionals involved in the care of patients with viral liver disease: established and trainee hepatologists, pediatric hepatologists, pathologists, radiologists, transplant surgeons and nurse specialists.

CLINICAL MEDICINE: INTERNAL MEDICINE: ONCOLOGY
Over three previous editions, Clinical Tuberculosis established itself as an indispensable guide to all aspects of tuberculosis diagnosis and treatment. This fully revised and updated fourth edition provides practical guidance to healthcare professionals involved in any aspect of patient management or disease control.

Provides a digest of the material contained in the Physics of Radiation Therapy textbook. Lectures are presented somewhat similar to a PowerPoint format, discussing key points of individual chapters. Selected diagrams from the textbook are used to initiate the discussion. New illustrations are used, wherever needed, to enhance the understanding of important concepts. Discussion is condensed and often bulleted. Theoretical details are referred to the textbook and the cited literature. A problem set (practice questions) is provided at the end of each chapter topic.

CLINICAL MEDICINE: INTERNAL MEDICINE: PULMONARY MEDICINE
The book provides clear, step-by-step, evidence-based guidance on the practicalities of all the principal techniques, and advice is offered on indications for NIV, how to choose equipment, when to initiate therapy, and when to discontinue therapy.

Provides up-to-date, authoritative and comprehensive information from a prestigious range of worldwide key opinion leaders on different applications for non-invasive ventilation, and closely related techniques, both in hospital and at home.

Clinical Medicine: Oral Surgery
This was first published in 1998, and within a very short period it has become the gold standard text for trainees in oral and maxillofacial surgery.

Clinical Medicine: Orthopedics
This book is a definitive and comprehensive guide to elective orthopaedic surgery for trainees preparing for FRCS and surgeons at MRCS level.

Clinical Medicine: Pain Management
Brings coverage of this diverse area together in a single comprehensive clinical reference, from the basic mechanisms underlying the development of acute pain, to the various treatments that can be applied to control it in different clinical settings.

The second edition of Chronic Pain now covers a vast scientific and clinical arena, with the scientific background and therapeutic options much expanded.

Largely reorganized and much expanded in this second edition, this book brings together in a single volume general methods of pain assessment and presents the wide range of therapies that can be provided by a range of health care disciplines.

Clinical Medicine: Pathology
Thoroughly updated and revised in line with the latest World Health Organization classification system, the second edition continues to be an essential guide to the interpretation of lymph node biopsies for all professional and trainee general pathologists and haematopathologists alike.

Hospital Autopsy, The: A Manual of Fundamental Autopsy Practice; Burton, Julian L.; Hodder Arnold,
Here’s an indispensable resource for pathologists in training, as well as a useful refresher for practicing pathologists and autopsy technicians.

In this third edition, Knight’s Forensic Pathology continues to be the definitive international postgraduate textbook for forensic pathologists, covering all aspects of the medicolegal autopsy, including the cause and time of death, interpretation of wounds, and every other facet of the investigation of a fatality.

This book has become a modern classic in its field, covering the practical aspects of the work of the neuropathologist. Full of sensible advice and observations often omitted from neuropathology texts, it guides the neuropathologist through the methods available to them when facing diagnostic questions.

CLINICAL MEDICINE: PSYCHIATRY
This book provides a concise but thorough overview of clinical trials in psychiatry, invaluable to those seeking solutions to numerous problems relating to design, methodology and analysis of such trials.

Culture and Mental Health is an authoritative text bringing together experts from around the world to discuss the provision of mental health services within multi-cultural societies and what this means in clinical and practical terms.

CLINICAL MEDICINE: RADIOLOGY
Full of handy hints, tips and cautions based upon the author’s own extensive clinical experience.

This book is a user-friendly handbook that can be used in day-to-day practice.

Covering the entire musculoskeletal system, and all conditions, both common and rare, Musculoskeletal MRI is an extensive yet accessible guide for use in the clinical setting.

CLINICAL MEDICINE: SURGERY
This is a new, concise postgraduate textbook of Paediatric Orthopaedics with its emphasis firmly on treatment, allowing trainee orthopaedic surgeons to make an informed contribution during their paediatrics rotation and to speak confidently about the approach to individual patients during their specialty exams.

HEALTH PROFESSIONS: DENTISTRY & DENTAL HYGIENE
This path-breaking volume contains the proceedings of a symposium held in June 1964 to discuss the concept of caries resistance. It is the electronic version of the printed volume originally published in 1965.

HEALTH PROFESSIONS: IMAGING TECHNOLOGY
From the stable of Clark’s Positioning in Radiography comes this practical pocket-sized rapid reference to radiographic techniques for students and qualified radiographers.

Imaging for Students; Lisle, David;

Provides a comprehensive introduction to all aspects of diagnostic and intervention imaging, written specifically for medical students and junior doctors.

HEALTH PROFESSIONS: RESIDENTS

This is an outstanding guide to the MRCS Viva examination. Its unique approach recreates the structure and content of each individual viva, allowing the reader to self-test, or two students to recreate mock viva sessions for themselves.

LIFE AND BIOMEDICAL SCIENCES:
ANATOMY

This concise new atlas of human anatomy for medical and allied healthcare undergraduates, postgraduate trainees, and teaching staff, presents the key anatomical knowledge necessary for clinical practice, at a level that is compatible with current core curricula, whether traditional or systems-based.

LIFE & BIOMEDICAL SCIENCES:
BIOINFORMATICS

This book demonstrates how cross-fertilization between traditional field studies and analogue and numerical forward modelling expands our understanding of Earth-surface systems.

LIFE & BIOMEDICAL SCIENCES:
CELL BIOLOGY

This comprehensive book on a topic of fundamental importance in our understanding of cancer begins with an overview of cellular junctions, before covering in detail cell-matrix junctions, cell-cell junctions as well as cell-matrix and cell-cell adhesion.

MEDICAL HUMANITIES: MEDICAL EDUCATION

Here’s the perfect companion for any psychiatrist preparing for the MRCPsych Part II exam, a postnominal qualification awarded to physicians who have completed the prescribed training requirements and membership examinations mandated by the UK’s Royal College of Psychiatrists.

This book is a vital resource for any psychiatrist preparing for the CASC part of the MRCPsych examination.

NURSING: FUNDAMENTALS OF NURSING

This third edition has been revised specifically for nursing and health care students working with adult patients, offering a more comprehensive guide that will last throughout initial training and beyond.

NURSING: GENERAL INTEREST
NURSING

This book addresses all the issues a patient may experience prior to receiving a VAD; selection of equipment, practical aspects of technique, the pros and cons of the various veins, and modifications of technique for certain circumstances are examined.

NURSING: MATERNAL/CHILD

Part of the popular Ten Teachers series, it presents a detailed account of care of the normal neonate, including the minor health problems that midwives are expected to deal with on a daily basis, and provides care and treatment strategies for the neonate and family.

NURSING: ONCOLOGY

This is a practically-based text for cervical nurses who wish to consolidate and update their knowledge of cervical cancer. It is concise, containing comprehensive information for general practice together with useful references to facilitate more in-depth study.

Community Palliative Care: The Role of the Clinical Nurse Specialist;
This book examines the complex support and information needs of seriously ill patients and their families and will encompass not only the patient’s journey, but that of the family during the illness trajectory and into the bereavement period.

**NURSING: PHARMACOLOGY**

A fully comprehensive and beautifully illustrated textbook, covering both the basic principles and the clinical aspects of pharmacology.

**NURSING: REFERENCES**

Compliant with CDC and WHO guidelines, this new A-to-Z reference provides an overview of 160 infectious diseases, from the common cold and otitis media to MRSA and other newer threats, including Bartonella quintana.

**PHARMACOLOGY: PHARMACOLOGY**

Allows readers to test their knowledge of Clinical Pharmacology and Therapeutics and not only develop exam technique but become a better prescriber.

**PUBLIC HEALTH: COMMUNITY HEALTH & DISEASE PREVENTION**

Here’s an essential reading for all medical students and professionals who may find themselves responding to incidents on the scale of the July 2005 London bombings or the May 2008 Chinese earthquake.

**SCIENCE: ANIMAL SCIENCES-AQUACULTURE & FISHERIES**

This is an essential purchase for all fish biologists, ecologists, fisheries managers and fish farm personnel who work with centrarchid species across the globe. It provides comprehensive coverage of all major aspects of this ecologically and commercially important group of fishes.

**SCIENCE: CHEMISTRY-BIOMOLECULAR CHEMISTRY**

This book facilitates a better understanding of and draws attention to stem cell and cancer biology - two fields that enhance, move, and evolve into each other continuously. It provides an informative study in designing approaches to apply stem cell principles to cancer biology while offering an overview of the challenges in developing combination stem and cancer biology targets for therapeutics. This book serves as a primer for new researchers in the field of cancer biology.

**BOOK COLLECTIONS**

The 2011 versions of LWW Core & Essential Doody’s eBook collections are now available on OvidSP. LWW Doody collections represent a selection of highly-rated LWW titles from Doody’s Review Services™, the world leader in providing authoritative and expert quality assessments of medical, nursing, and allied health books. The collections include:

**2011 LWW Doody’s Core Title Collection**

206 books designated as Doody’s Core Titles™ in health sciences and nursing. They’ve been selected by academically-affiliated healthcare professionals and medical librarians, and are considered must-have resources for practitioners, researchers, and students. 123 books have received a Doody’s score of 2.5 or above (out of 3). 15 books in the collection have received a 3, the highest score available:

- **Berek & Novak’s Gynecology, 14th Edition, 3 - Obstetrics & Gynecology**
- **Biopsy Interpretation of Soft Tissue Tumors, 1st Edition, 3 - Surgical Pathology**
- **Breast Imaging, 3rd Edition, 3 - Diagnostic Radiology**
- **Cardiac Nursing, 6th Edition, 3 - Coronary Care**
- **Danforth’s Obstetrics & Gynecology, 3 - Obstetrics & Gynecology**
- **DeJong’s The Neurologic Examination, 6th Edition, 3 - Neurology**
- **DeVita; Hellman; and Rosenberg’s Cancer: Principles & Practice of Oncology, 9th Edition, 3 - Hematology/Oncology**
- **Feigenbaum’s Echocardiography, 7th Edition, 3 - Cardiology**
- **Handbook of Psychiatric Drug Therapy, 6th Edition, 3 - Psychiatry**
- **Irwin & Rippe’s Intensive Care Medicine 6th Edition, 3 - Critical Care**
- **Lippincott’s Nursing Procedures, 3 - Ambulatory**
• Neurological and Neurosurgical Intensive Care, 4th Edition, 3 - Neurosurgery
• Professional Guide to Signs & Symptoms, 3 - Ambulatory
• Rockwood and Wilkins Fractures in Children, 7th Edition, 3 - Pediatric Surgery
• Wills Eye Manual, 3 - Ophthalmology

2011 LWW Doody’s Essential Collection
51 Doody’s Core Titles™ considered essential for institutions building a foundation for their medical eBook collection. Titles are chosen by two librarians with subject area expertise working independently, and include:
• DeJong’s The Neurologic Examination, 6th Edition
• DeVita, Hellman & Rosenberg’s Cancer: Principles & Practice of Oncology, 9th Edition
• Lippincott’s Nursing Procedures, 5th Edition
• Rockwood and Wilkins Fractures in Children, 7th Edition
• And many more

The 9th edition of DeVita, Hellman & Rosenberg’s Cancer: Principles & Practice of Oncology has received a Doody’s score 3 and is part of both the Core & the Essential Collection.

Database News
The 2011 Inspec database global reload was completed on Thursday, June 2, 2011.

With this reload, a Classification Codes and Thesaurus tool has been implemented. Links to Videos (from OvidSP records to videos on EIT website) are also now available. Additionally, a reference section for Cited References, complete with 19 new fields, has been added.

A reload of the Zoological Records® database on OvidSP is scheduled for early July to incorporate the new 2011 tree tools. Additionally, alerts will be flushed a week prior to the reload.

As part of this scheduled reload, stopwords will be eliminated from this database. You will be able to enter search terms such as adaptation along an environmental gradient.tw and generate a valid results list.

In addition, Ovid has made the following changes
9 New Fields
• Author E-mail (AE)
• Book URL (BL)
• Date Delivered (DD)
• Digital Object Identifier (DO)
• Item URL (IU)
• Journal URL (JL)
• Medium (MM)

**Featured Book**

**Joint Replacement Arthroplasty: Basic Science, Elbow and Shoulder, 4th Edition**

**Lippincott Williams & Wilkins**

*Thoroughly updated and expanded into two volumes, this new edition provides comprehensive coverage of primary and revision arthroplasty procedures for the upper and lower extremities.*

**Doodys Star Rating®:** 5 stars, score: 100; Doody’s Core Titles™ in the Health Sciences - Orthopedics: 2.8

See the excerpt below of an expert review from Doody's Review Service (www.doody.com/drs) written by Riad Barmada, MD; University of Illinois at Chicago College of Medicine

★ ★ ★ ★ ★ "This is an outstanding publication, very easy to read, that provides practical and helpful information on elbow and shoulder replacement from experts. What are very helpful are the discussions of special considerations and techniques for specific diseases and separate chapters on the pathological disorders of the elbow and shoulder."

To see more information about this book, go to
