平 台 新 聞

OvidMD 已於 2011 年 5 月 18 日星期三推出。

OvidMD 是 Ovid 率先推出的臨床工具，根 據 Ovid 最新的相關全文內容，針對醫師的問題迅速提供解答。

OvidMD 的設計是從臨床、實證基礎著眼，可以確保結果對執業醫師而言確有意義。OvidMD 能夠展現效率且易於使用，並由 Ovid 專家發展出成熟的檢索技術。

以下是 OvidMD 提供的部分內容清單！
- Ovid MEDLINE®
- Transplant Library
- UpToDate® 文章與病患須知
- A 至 Z 藥物資訊
- 實證性指南
- McKesson® 旗下部門 RelayHealth
- 提供的病患須知
- 全國性指南
- MedCalc
- LWW Current Opinion 期刊
- 期刊與書籍主題選集
- 以及許多其他資訊

如需 OvidMD 的詳細資訊，請造訪 www.ovidmd.com

書 籍 新 聞

請在下方參閱 59 本新版的優質電子書的相關說明。

行為與社會科學：心理學-教育心理學

This comprehensive book looks at the phenomenon of cheating from primary through graduate school. It presents the research on cheating in a clear and accessible way and provides practical advice and insights for educators, school administrators, and the average lay person.

臨床醫學：麻醉學

A thorough revision and update of the extremely popular Paediatric Anaesthesia by Edward Sumner and David Hatch.

臨床醫學：內科醫學：心臟學

Growing clinical experience and additional clinical trials are resulting in changes in how patients are selected for CRT. This book—now in its second edition—provides basic knowledge as well as an up-to-date summary of new advances in CRT for heart failure.

With numerous illustrations of these...

With its comprehensive coverage of theoretical, historical, cross-cultural, and evolutionary perspectives, this book holds significant insights for parents, educators, and clinicians.

行為與社會科學：心理學-臨床心理學
Measuring and managing depression and periods of low mood, with support from a health care professional.

Children and Play: Understanding

Psychiatry, Older People, Forensic Psychiatry, Child and Adolescent Psychiatry and Learning Disability Psychiatry.

The first 72 hours following assessment and admission to the emergency department are crucial to a patient’s care. Medical practitioners on duty need good diagnostic skills and the ability to formulate a quick, safe and appropriate management plan. Making Sense of Acute Medicine is here to help.

Provides invaluable ‘hands-on’ guidance for medical students and junior doctors when presented with a new patient.
devices, technologies, and strategies to improve the CTO success rate, this clinical guide is the ideal companion for interventional cardiologists and cardiac surgeons who are required to perform angioplasty and coronary stenting.

This brief guide to visual diagnosis helps the novice develop -- and the veteran refresh -- crucial skills that can spare the patient unnecessary testing and bring the physician one step closer to an accurate diagnosis.

This important revision presents the accumulated knowledge of its highly-regarded author, Dr. Abraham Rudolph, who is internationally recognized as one of the world’s leading pioneers in the field of Pediatric Cardiology.

Presents everything you need to assess your ability to interpret ECGs accurately; perform differential diagnosis; and decide upon the most appropriate clinical management in each situation.

The handbook’s ‘how to’ approach makes it the ideal reference text for the practicing sonographer.

Over three previous editions, Clinical Tuberculosis established itself as an indispensable guide to all aspects of tuberculosis diagnosis and treatment. This fully revised and updated fourth edition provides practical guidance to healthcare professionals involved in any aspect of patient management or disease control.

Provides a digest of the material contained in the Physics of Radiation Therapy textbook. Lectures are presented somewhat similar to a PowerPoint format, discussing key points of individual chapters. Selected diagrams from the textbook are used to initiate the discussion. New illustrations are used, wherever needed, to enhance the understanding of important concepts. Discussion is condensed and often bulleted. Theoretical details are referred to the textbook and the cited literature. A problem set (practice questions) is provided at the end of each chapter topic.

The book provides clear, step-by-step, evidence-based guidance on the practicalities of all the principal...
techniques, and advice is offered on indications for NIV, how to choose equipment, when to initiate therapy, and when to discontinue therapy.

Provides up-to-date, authoritative and comprehensive information from a prestigious range of worldwide key opinion leaders on different applications for non-invasive ventilation, and closely related techniques, both in hospital and at home.

The second edition of Chronic Pain now covers a vast scientific and clinical arena, with the scientific background and therapeutic options much expanded.

Largely reorganized and much expanded in this second edition, this book brings together in a single volume general methods of pain assessment and presents the wide range of therapies that can be provided by a range of health care disciplines.

Brings coverage of this diverse area together in a single comprehensive clinical reference, from the basic mechanisms underlying the development of acute pain, to the various Treatments that can be applied to control it in different clinical settings.

An Introduction to Radiation Protection is an accessible account of the nature of the hazards presented by ionizing radiation and the methods of protection, for those new to the field and for the non-specialist.

Thoroughly updated and revised in line with the latest World Health Organization classification system, the second edition continues to be an essential guide to the interpretation of lymph node biopsies for all professional and trainee general pathologists and haematopathologists alike.
Here’s an indispensable resource for pathologists in training, as well as a useful refresher for practicing pathologists and autopsy technicians.

In this third edition, *Knight’s Forensic Pathology* continues to be the definitive international postgraduate textbook for forensic pathologists, covering all aspects of the medicolegal autopsy, including the cause and time of death, interpretation of wounds, and every other facet of the investigation of a fatality.

This book has become a modern classic in its field, covering the practical aspects of the work of the neuropathologist. Full of sensible advice and observations often omitted from neuropathology texts, it guides the neuropathologist through the methods available to them when facing diagnostic questions.

Part of the 100 Cases series, designed for students, this volume on Paediatrics covers Respiratory, Cardiology, Endocrinology and diabetes, Gastroenterology, Nephrology, Infections, Dermatology, Haematology, Oncology, Bones and joints, Neurology, Child and Adolescent Psychiatry, and Neonatology.

Covering the entire musculoskeletal system, and all conditions, both common and rare, *Musculoskeletal MRI* is an extensive yet accessible guide for use in the clinical setting.

Part of the 100 Cases series, designed for students, this volume on Paediatrics covers Respiratory, Cardiology, Endocrinology and diabetes, Gastroenterology, Nephrology, Infections, Dermatology, Haematology, Oncology, Bones and joints, Neurology, Child and Adolescent Psychiatry, and Neonatology.

This book provides a concise but thorough overview of clinical trials in psychiatry, invaluable to those seeking solutions to numerous problems relating to design, methodology and analysis of such trials.

*Culture and Mental Health* is an authoritative text bringing together experts from around the world to discuss the provision of mental health services within multi-cultural societies and what this means in clinical and practical terms.

Full of handy hints, tips and cautions based upon the author’s own extensive clinical experience.

This book is a user-friendly handbook that can be used in day-to-day practice.
From the stable of *Clark’s Positioning in Radiography* comes this practical pocket-sized rapid reference to radiographic techniques for students and qualified radiographers.

Provides a comprehensive introduction to all aspects of diagnostic and interventional imaging, written specifically for medical students and junior doctors.

This concise new atlas of human anatomy for medical and allied healthcare undergraduates, postgraduate trainees, and teaching staff, presents the key anatomical knowledge necessary for clinical practice, at a level that is compatible with current core curricula, whether traditional or systems-based.

This book demonstrates how cross-fertilization between traditional field studies and analogue and numerical forward modelling expands our understanding of Earth-surface systems.

This comprehensive book on a topic of fundamental importance in our understanding of cancer begins with an overview of cellular junctions, before covering in detail cell-matrix junctions, cell-cell junctions as well as cell-matrix and cell-cell adhesion.

Here’s the perfect companion for any psychiatrist preparing for the MRCPsych Part II exam, a postnominal qualification awarded to physicians who have completed the prescribed training requirements and membership examinations mandated by the UK’s Royal College of Psychiatrists.

Part of the popular Ten Teachers series, it presents a detailed account of care of the normal neonate, including the minor health problems that midwives are expected to deal with on a daily basis, and provides care and treatment strategies for the neonate and family.

This book is a vital resource for candidates preparing for the Clinical Assessment of Skills and competencies (CASC) part of the MRCPsych examination.
This is a practically-based text for clinical nurses who wish to consolidate and update their knowledge of cervical cancer. It is concise, containing comprehensive information for general practice together with useful references to facilitate more in-depth study.

**Illustrated Pharmacology for Nurses**

A fully comprehensive and beautifully illustrated textbook, covering both the basic principles and the clinical aspects of pharmacology.

**Clinical Pharmacology and Therapeutics: Questions for Self Assessment**

Allows readers to test their knowledge of Clinical Pharmacology and Therapeutics and not only develop exam technique but become a better prescriber.

**Cervical Cancer: A Guide for Nurses**

This book examines the complex support and information needs of seriously ill patients and their families and will encompass not only the patient’s journey, but that of the family during the illness trajectory and into the bereavement period.

**Cervical Cancer: A Guide for Nurses**

This book facilitates a better understanding of and draws attention to stem cell and cancer biology - two fields that enhance, move, and evolve into each other continuously. It provides an informative study in designing approaches to apply stem cell principles to cancer biology while offering an overview of the challenges in developing combination stem and cancer biology targets for therapeutics. This book serves as a primer for new researchers in the field of cancer biology.

資料庫新聞

2011年 Inspec 資料庫全面重整於 2011年 6月 2日（週四）完成。

在本次重整中導入了分類代碼及辭典工具。現在也提供了影片連結（從 OvidSP 記錄連結到 EIT 網站上的影片）。此外還加入了引用文獻的參考文獻區段，內含 19 個新增欄位。

OvidSP 上的 Zoological Records® 資料庫預計在7月初進行重整，以加入新的 2011版樹狀結構工具。此外，快訊將在重整前一週清除。

此外，Ovid 進行了下列更動

3 個欄位變更
• Super Taxa (ST)
• 系統化 (SY)
• Zoological Records 更新 (ZU)
