行为与社会科学：心理学

This book aims to demonstrate how forensic psychology contributes to police investigations, providing practical information about the type of reports provided by psychologists and behavioral advisers, and set within a broader theoretical context. It asks the question - What do practitioners actually do when they provide advice for the police and the courts and how do they do it?

This is a comprehensive reference book on the subject of forensic mental health, looking at what forensic mental health is and its assessment, management and treatment. It focuses on key topics and the issues underpinning them in contemporary society.

A key aim of the book is to explore a wide range of historical and contemporary issues relating to prisons, imprisonment and prison management, and to chart likely future trends. Chapters in the book are written by leading scholars in the field, and reflect the range and depth of prison research and scholarship.

This book presents a series of mostly qualitative studies that investigate individual identity transformation from offender status to pro-social, non-offending roles.

International Developments in Investigative Interviewing;

The objective of this book is to review the position of investigative interviewing in a variety of different countries, with different types of criminal justice systems, and consists of chapters written by leading authorities in the field, both academics and practitioners.

Sex offenders, and in particular pedophiles, have been the subject of much political and media attention, producing intensive debates about the best way of dealing with them. This book explores these issues, evaluating the measures in use or being considered, including drug treatment, MAPPA, the use of the Sex Offender Register, restorative justice techniques, and treatment...
programs. It is concerned with high-risk sex offenders both when they are sentenced to a community order, and also when they are released back into the community after a custodial sentence.

The book is based on in-depth interviews with 32 convicted male sex offenders attending three different sex offender treatment programs (the prison based Sex Offender Treatment Programme, Behaviour Assessment Programme and the community-led Sex Offender Groupwork Programme).

This book provides a systematic account of parental behavior and the means of identifying and addressing inadequate parenting. It is intended for professionals who work with children or adults who were harmed as children, and its central concern is with parents who endanger their children or whose children may endanger themselves or others.

Provides a critical overview of social work and community justice in Scotland, taking full account of recent developments.

What causes young people to offend? What influence do schools have on young peoples' offending behavior in relation to other possible causal factors? These critical criminological and educational questions are addressed in *Schools and the Problem of Crime*.

This book explores current criminal justice responses to the management of individuals who are convicted of sexual offences.

The threat of violence concerns most people most profoundly. It has long been a topic of intensive academic, practical and political debate and in recent years the workplace has emerged as a recognized site of violence, threat and menace. This book makes a significant contribution to the growing literature on workplace violence.

The book is concerned particularly to assess the operation of sex offender treatment programs in the UK context, considering also the issues associated with implementing programs developed in other contexts, especially the USA and Canada.

This book aims to integrate psychological and criminological perspectives in order to better understand the nature of criminal behavior. In particular it aims to explore the range of psychological approaches that seek to understand the significance of the emotions that surround criminal behavior, allowing for an exploration of individual differences and social and cultural issues which help to bridge the gaps between disciplinary approaches.

This is an accessible text which clarifies the crucial theoretical and methodological debates surrounding the study of criminal careers.

Clinical Medicine: Dermatology

This concise new reference uses tables, algorithms, protocols, guidelines, and staging and scoring systems to present succinct guidance on best-practice patient care.

Clinical Medicine: Infectious Diseases

The fully updated second edition of this case-led text provides an excellent introduction to evidence-based clinical practice for the major areas of infectious disease management. The new edition takes on a brand new design and focus, making the book more accessible to junior doctors in infectious diseases and microbiology and general internists.

Clinical Medicine: Gastroenterology and Hepatology

Traditional textbooks in this field have emphasized the basic sciences of pathology, biochemistry and physiology. Evidence-based Gastroenterology and Hepatology covers all the major diseases of the gastrointestinal tract and liver, utilizing clinical epidemiology to present the strongest and most current evidence for interventions.

Clinical Medicine: Obstetric Anesthesia

This is the first text to systematically review the evidence for obstetric anesthesia and analgesia.

Clinical Medicine: Oncology

Evidence-based Oncology; Williams, Christopher B.; Bramwell, Vivien; Bonfill, Xavier; Cuzick, Jack; Grant, Robin; Guthrie, David; Mason, Malcolm; Simmonds, Peter; Singh, Arun D.; Weston, Rosalynne; Williams, Hywel C.; Wiley-Blackwell, 1st edition (2003); 613 pages; ISBN-13: 978-0727914392

Employee Well-being Support: A Workplace Resource is a detailed guide to employee wellbeing.

Written in jargon free language, this book covers the assessment of people within the workplace.

A unique combination of contributions from an academic and a practitioner for each topic.

This book provides a practical guide to, and critical review of, community and individual professional interventions that could ease the lives of children with developmental disorders and mental health problems.

The first interdisciplinary book taking a contextual approach to the developing health needs of women with intellectual disabilities.

Provides an up-to-date summary of the latest theory and practice in unipolar and bipolar mood disorders.

Claims of amnesia for violent and sexual crimes are extremely common as guilty suspects often allege memory loss to avoid punishment. The important issue in each case then becomes whether such memory loss is genuine or feigned. Offenders’ Memories of Violent Crimes takes a different approach to the subject by focusing not on eyewitness or bystander testimonies, but on the testimonies of the offenders, or, more specifically, offenders’ remembering and telling about their violent crimes.

Practitioners in Community Mental Health Teams (CMHTs) frequently find that traditional forms of support are ineffective when offered to patients with personality disorder. This book considers the various difficulties encountered, with reference to current thinking about the origins, maintenance and treatment of personality disorder.

Is Posttraumatic Stress Disorder (PTSD) an illness that arises after horrific and life-threatening events? Or is it a label that medicalizes human suffering, and brings with it more problems than it solves.

The Psychoanalytic Movement explains how the language of psychoanalysis became the dominant way in which the middle classes of the industrialized West speak about their emotions.

In this innovative book, Hermione Roff introduces Reflective Interpersonal Therapy for Children and Parents (RICAP), a new intervention that looks at the processes underpinning disruptive and aggressive behavior problems.

Presents the latest international developments and practical treatment interventions that can be used with co-morbid individuals and their families.

A timely overview of new psychological interventions in this exciting and emerging field, presenting the most up-to-date progress in the identification of individuals who are at ultra high risk of developing a psychotic illness.

This edited collection showcases the latest thinking in LGBTQ psychology.

This book is concerned to shed further light on the nature of public views on criminal justice.

Provides a comprehensive analysis of the issues relating to work with women offenders.

This book exposes some of the most prevalent myths about crime and criminal behavior. In addition it provides the reader with up-to-date knowledge on crime and offending behavior. It also highlights the ways in which psychological methods of research and psychological knowledge can help us to understand criminal behavior and the ways that targeted interventions can be developed.

Published under the auspices of the European Association of Social Psychology, the European Review of Social Psychology is an annual series that reflects the dynamism of social psychology in Europe, the attention now paid to European ideas and research, and the exchange of ideas between Europe and the rest of the world.
