Noticias sobre libros

CIENCIAS SOCIALES Y DEL COMPORTAMIENTO: PSICOLOGÍA
This book aims to demonstrate how forensic psychology contributes to police investigations, providing practical information about the type of reports provided by psychologists and behavioral advisers, and set within a broader theoretical context. It asks the question - What do practitioners actually do when they provide advice for the police and the courts and how do they do it?

This is a comprehensive reference book on the subject of forensic mental health, looking at what forensic mental health is and its assessment, management and treatment. It focuses on key topics and the issues underpinning them in contemporary society.

A key aim of the book is to explore a wide range of historical and contemporary issues relating to prisons, imprisonment and prison management, and to chart likely future trends. Chapters in the book are written by leading scholars in the field, and reflect the range and depth of prison research and scholarship.

Sex offenders, and in particular pedophiles, have been the subject of much political and media attention, producing intensive debates about the best way of dealing with them. This book...
explores these issues, evaluating the measures in use or being considered, including drug treatment, MAPPA, the use of the Sex Offender Register, restorative justice techniques, and treatment programs. It is concerned with high-risk sex offenders both when they are sentenced to a community order, and also when they are released back into the community after a custodial sentence.

The book is based on in-depth interviews with 32 convicted male sex offenders attending three different sex offender treatment programs (the prison based Sex Offender Treatment Programme, Behaviour Assessment Programme and the community-led Sex Offender Groupwork Programme).

This book provides a systematic account of parental behavior and the means of identifying and addressing inadequate parenting. It is intended for professionals who work with children or adults who were harmed as children, and its central concern is with parents who endanger their children or whose children may endanger themselves or others.

Provides a critical overview of social work and community justice in Scotland, taking full account of recent developments.

What causes young people to offend? What influence do schools have on young peoples’ offending behavior in relation to other possible causal factors? These critical criminological and educational questions are addressed in Schools and the Problem of Crime.

This book explores current criminal justice responses to the management of individuals who are convicted of sexual offences.

The threat of violence concerns most people most profoundly. It has long been a topic of intensive academic, practical and political debate and in recent years the workplace has emerged as a recognized site of violence, threat and menace. This book makes a significant contribution to the growing literature on workplace violence.

The book is concerned particularly to assess the operation of sex offender treatment programs in the UK context, considering also the issues associated with implementing programs developed in other contexts, especially the USA and Canada.

This book aims to integrate psychological and criminological perspectives in order to better understand the nature of criminal behavior. In particular it aims to explore the range of psychological approaches that seek to understand the emotions that surround criminal behavior, allowing for an exploration of individual differences and social and cultural issues which help to bridge the gaps between disciplinary approaches.

Understanding Criminal Careers; Soothill, Keith; Fitzpatrick, Claire; Francis, Brian; Willan Publishing,

Claims of amnesia for violent and sexual crimes are extremely common as guilty suspects often allege memory loss to avoid punishment. The important issue in each case then becomes whether such memory loss is genuine or feigned. Offenders’ Memories of Violent Crimes takes a different approach to the subject by focusing not on eyewitness or bystander testimonies, but on the testimonies of the offenders, or, more specifically, offenders’ remembering and telling about their violent crimes.

This book presents the latest thinking and research in Personal Construct Psychology (PCP) covering a broad range of areas of interest to both researcher and practitioner.

Practitioners in Community Mental Health Teams (CMHTs) frequently find that traditional forms of support are ineffective when offered to patients with personality disorder. This book considers the various difficulties encountered, with reference to current thinking about the origins, maintenance and treatment of personality disorder.

Is Posttraumatic Stress Disorder (PTSD) an illness that arises after horrific and life-threatening events? Or is it a label that medicalizes human suffering, and brings with it more problems than it solves.
